

DURATURF® Matrix

Features

- **Binding strength**
- **Rhizomatous growth habit**
- **Rapid establishment**
- **Increased wear tolerance and recovery**

DURATURF® Matrix has been specially designed to stabilise sandy or sandy loam sports fields that receive extensive use. The rhizomatous tall fescue component creates a chicken wire effect, locking the soil particles together, so where turf cover is lost the soil remains stable. This will ensure safe playing conditions, even under the most intensively worn situations.

Contains

Cultivar	Species
Colosseum	Perennial ryegrass
Arena I	Perennial ryegrass
Regenerate	Tall Fescue

Application Rates

Sowing rate: 30-50g/m² (3.5kg/100m²)

Oversowing: 25-35g/m² 2.5-3.5kg/100m²)

Mowing Heights

Down to 25mm
